

Expense Tracker Web Application

Team Members:

- Aryan Nitin Kate (Roll No. 07)
- Sanket Vithoba Korde (Roll No. 12)
- Dipesh Mahesh Karalkar (Roll No. 06)
- Ved Ravindra Kumare (Roll No. 14)

Problem Statement:

Managing personal expenses is often challenging for individuals, especially when tracking daily spending habits. Without a proper system, users may lose track of their financial activities, leading to poor budgeting and overspending. The problem is to design a simple, user-friendly web application that allows users to record, categorize, and monitor their expenses effectively.

Description:

The Expense Tracker is a web-based application accessible at <https://mdmminiproject.infinityfreeapp.com/>. It enables users to:

- Add and categorize expenses.
- View summaries of spending.
- Track financial activities over time.
- Maintain a structured record for better budgeting.

Technology Used:

Client-Side Scripting: HTML, CSS, JavaScript

Server-Side Scripting: PHP

Database: MySQL

Layout Design Snapshots:

- Home Page: Displays navigation and expense summary.
- Add Expense Page: Form for entering expense details.
- Expense List Page: Shows categorized expenses with date and amount.

Database Design:

Table: Users

- - user_id (Primary Key)
- - username
- - password

Table: Expenses

- - expense_id (Primary Key)
- - user_id (Foreign Key)
- - category
- - amount
- - date
- - description

Conclusion:

The Expense Tracker project successfully addresses the problem of managing personal finances by providing a simple, efficient, and accessible solution. It helps users monitor their spending habits, categorize expenses, and maintain financial discipline. The project demonstrates effective use of web technologies and database management to solve a real-world problem.
